Software Developer (Full-Stack)

Software Developer with 2 years of full-stack web development experience specialising in ASP.NET and NextJS. An expert in working with the entire software development life cycle due to working in a small team for multiple projects. I love learning more about algorithms and data structures in my free time.

Skills

Programming Languages: Java, C#, C, Python, HTML, CSS, Javascript
Frameworks/Libraries: ASP.NET, ReactJS, React Native, NextJS, WordPress, Xamarin, Tensorflow
Databases: Microsoft SQL, MySQL, MongoDB
CI/CD: Git, BitBucket
Cloud Services: AWS, Microsoft Azure

Work Experience

Wunderfauks, Singapore | **Web/Full-stack developer** | 07/2021 - Present
- Developed multiple attractive commercial websites, with NextJS, PHP and WordPress integration, meeting client needs in terms of design and performance.
- Designed reusable component templates using NextJS/ReactJS to ensure the templates are fast and easily reusable.
- Created games using JavaScript, PHP and MySQL allowing registered users to play the games once a day.
- Collaborated with multiple designers and developers to help achieve the best user experience and easy to navigate user interfaces.
- Designed SEO-friendly websites allowing search engines to easily crawl the website, increasing the website performance by 50%.

Arrowcrest Technologies Pte Ltd | **Software Developer** | 05/2020 - 07/2021
- Developed and Maintained a CRM application used only by employees, created using C#, ASP.NET, and SQL, allowing the company to manage their customers, employees, and attendance and replace the vendor.
- Built ASP.NET back-end REST APIs, allowing other software applications to perform basic operations for persistent storage.
- Developing Java applications to access REST APIs which enables the communication between the cloud and hardware systems.
- Performing software tests and code reviews before deployment to ensure software updates happen smoothly.
- Worked together with IT Director and Software Team Lead to participate in SCRUM meetings and consultation with clients, vendors and other engineers.

Education

BEng in Computer Science (Part-Time), Expected Graduation - 2024
Nanyang Technological University, Singapore

Diploma in Information Technology, Graduation Year 2020
Singapore Polytechnic, Singapore

Projects

min-khant-kyaw/minkkyaw.com
A personal portfolio, developed using nextJS and ChakraUI. It also serves as a platform to blog my journey and showcase my latest work and achievements through MDX blogs.

5on25.com
A commercial website, built using nextJS, and its content, managed by WordPress CMS. Designed using SEO-friendly practices and Google Analytics for tracking website performance.
